- In 2024, Ohio had 114 homicides from Domestic Violence, 23 in Franklin County.
- 62% increase in gender-based violence from previous years.
- 98% of sex trafficking victims in Ohio are white females aged 21-29.
- Ohio is ranked among the highest of “reported” human trafficking cases in the country.
- Among adolescents aged 12-17, females are 61.5% more likely to have an alcohol use disorder than male counterparts
- Women are the fastest growing population affected by addiction

Zonta Foundation of Columbus supports programs for women at risk and in recovery from human trafficking, domestic violence, and substance abuse. We provided donations, meals, clothing, toiletries to over 350 women last year. Our partner agencies desperately need our support as they face decreases in funding and assistance for these women at risk.

Zonta also provides scholarships to female high school seniors and to non-traditional women pursuing their education later in life.

Thank you for participating in this fundraiser.
